

# SURESH SARAGADAM

## AI Engineer | Senior Software Development Engineer

Visakhapatnam, Andhra Pradesh, India

Phone: +91 901-030-3509 | Email: saragadamsuresh174@gmail.com

LinkedIn: linkedin.com/in/suresh-saragadam-11017415a | Portfolio: sureshsaragadam.vercel.app

### PROFESSIONAL SUMMARY

AI Engineer and Senior Software Development Engineer currently employed at NielsenIQ (October 2022 to Present). Full stack experience with React and Node.js. For 1.5 years built a production Generative AI conversational assistant that understands user intent and returns grounded responses from product systems. Skilled in Azure OpenAI, Langfuse, Python, Pydantic, prompt engineering, LLM evaluation, and observability for safe prompt changes in production. Seeking AI Engineer roles focused on production GenAI and LLM applications.

### CORE SKILLS

**AI and Machine Learning:** Generative AI, LLM, Azure OpenAI, GPT-4o, GPT-4o-mini, o-series, intent understanding, grounded responses, prompt engineering, prompt evaluation, regression testing, Langfuse, LLM observability, Python, Pydantic, structured outputs, Agentic AI, conversational AI, chatbot

**Frontend:** React, React.js, JavaScript, TypeScript, Bootstrap, Analytics UI

**Backend:** Node.js, NestJS, Python, REST APIs, PHP, Yii2, Laravel

**Databases:** MySQL, PostgreSQL, MongoDB

**Tools and Platforms:** Docker, Nginx, Apache, Keycloak, Git, GitHub, Jira, Linux

### PROFESSIONAL EXPERIENCE

#### Senior Software Development Engineer | NielsenIQ (NIQ)

October 2022 - Present | India | Currently Active

- Currently active at NielsenIQ building production retail analytics applications for CPG manufacturers.
- Built a production Generative AI assistant (1.5 years) that understands user intent and responds using internal system data.
- Integrated Azure OpenAI GPT models; implemented automated evaluators so prompt changes do not break existing flows.
- Used Langfuse for LLM observability; used Python and Pydantic for structured outputs and reliable pipelines.
- Delivered full stack features with React frontend and Node.js/Python backend; shipped reusable components across teams.

#### Senior Software Development Engineer | Tata Consultancy Services (TCS)

January 2021 - September 2022 | India

- Developed React.js retail analytics applications for CPG manufacturers and reusable frontend components.
- Received Innovista Award and client Duct Tape Award for module delivery impact.

#### Software Development Engineer | Schemax Expert Techno Crafts

February 2017 - December 2020 | India

- Built Brandix Shop Floor Control REST APIs for manufacturing productivity tracking across plants.
- Supported BIEAP examination valuation systems; integrated Keycloak authentication; delivered IoT vehicle tracking and payment gateway features.

### PROJECTS

#### Intent-Aware Analytics Assistant | NielsenIQ

Azure OpenAI, Langfuse, Python, Pydantic, Prompt Evaluation, React, Node.js | 1.5 years

- Production conversational AI assistant that maps user intent to system data and returns accurate analytics responses.
- Improved reliability with Langfuse tracing, Pydantic structured outputs, and evaluator suites for safe prompt iteration.

### EDUCATION

#### Bachelor of Science in Computer Science | Dr. Hima Sekhar Degree College

July 2012 - May 2015 | Vizag, India | CGPA: 7.00/10

Coursework: Data Structures, Algorithms, Computer Architecture, Database Systems, Operating Systems, Software Engineering

### AWARDS AND ACHIEVEMENTS

- Excellence Award (Schemax); USA client appreciation for one-week delivery; CTO appreciation for fast technology ramp-up.
- Innovista Award (TCS); client Duct Tape Award (TCS); college technical fest coordinator and problem setter.
